## INTRODUCTION

The various tables in this publication on characteristics of Montana's male veterans are largely based on data from the last U. S. Census of population, since this is the latest available source of information of any detailed nature. At that time there were 99,983 veterans in Montana, of which 16,556 were Viet Nam-era veterans. However, from the latest Employment Security estimate for July 1974, the number of veterans in Montana rose to about 108,900. The number of Viet Nam-era veterans climbed to 27,000.

Total number of Veterans (Census)	99,983
Deaths	4,200
In-migration	2,700
New Veterans	10,400
Total number of Veterans (1974)	108,900

Of the 99,983 male veterans in Montana, 54,866 were from urban areas and 45,117 were from the rural areas of Montana. Married veterans totaled 81% and 6.7% were widowed or divorced.

In terms of education, the average (median) veteran has completed 12.4 years of school; 37.5% of the veterans had completed high school and 7.5% or 7,510 had completed 4 years of college.

There were 86.2% of the veterans in the labor force and 81,534 or 81.5% of them were employed. The unemployment rate for veterans was 5.4% compared with 7.9% for all males 16 years and older.

Labor Force	86,149
Employed	81,534
Unemployed	4,615
Rate (percent)	5.4%
Not in Labor Force	13,834

## A LOOK AT VETERANS' BENEFITS

By Robert Aubrey  
Montana Employment Security Division  
Research and Analysis Section

In 1971, one of every seven Americans was a veteran in this country. However, veterans accounted for only about one-third of the potential recipients of veteran benefits in 1974. In fact, veterans and their families comprise 44.5% of the total U. S. population. It is no wonder that they are such an important and powerful minority. In 1972, the U. S. government spent \$11.5 billion on behalf of veterans. These expenditures covered a wide spectrum of benefits ranging from helping young veterans find jobs or learn a skill, to the financial support of the needy, or the payment of burial expenses for deceased veterans.

Since the very birth of this nation, it has been considered an obligation to help care for those who served in behalf of our defense. The first form of veteran compensation originated in 1776, when a commission appointed by the Continental Congress recommended disability payments for incapacitated soldiers, and land grants to the war soldiers as an incentive to extend their duty. Then in 1818, the first general veteran pension was initiated with eligibility based on "need". Payments ranged from \$8.00 for enlisted personnel to \$20.00 for officers. In 1833, the U. S. Naval Home became the first facility for the aged and disabled veterans.

At the outbreak of the Civil War, there were approximately 80,000 veterans in the United States. The Civil War added 1.9 million veterans back into civilian life. Because of their number, the veteran population really gained political power, and the number and amount of veteran benefits continued to grow during the post-Civil War period. The first veterans' organization, The Grand Army of the Republic, helped unite the Civil War veterans toward their common goals.

World War I added 4.7 million ex-military citizens. This period brought in new programs such as War Risk Insurance, an insurance against death and permanent disability.

After World War II, 16 million persons left the military and reentered civilian life. The returning veterans caused a tremendous increase in the labor supply of an already post-war slumping economy. With memories of the "Great Depression" still fresh, Congress had a changed attitude about veterans, and programs to help get them readjusted to a civilian life.

There had been 406,000 killed and another 671,000 wounded during that war. The nation had a strong feeling that the survivors deserved some type of compensation. As a result, the Congress passed a "G. I. Bill of Rights". Although many new benefits have been passed since, this bill set up the foundation of our modern veteran benefits system. The provisions of the

bill were classified into three major classifications: education and training, employment assistance, and housing. The veteran students were given subsistence allowances and direct tuition grants to the school of their choice. The unemployed were given unemployment compensation, counseling, guidance, placement services, and legislation granting special preference to veterans in public service jobs. Under the G. I. Guaranty Loan Program, veterans were able to obtain federally guaranteed loans to purchase housing.

After years of medical care and other veteran benefits being handled by various agencies, the Veterans Administration was established in 1930. Today, this is one of the largest federal agencies in the country. In 1972, the Veterans Administration employed 172,000 full-time employees. Of this number 87% were employed in hospitals. Scattered across the country are 167 hospitals, 18 domiciliaries and 57 regional offices in the decentralized agency.

In Montana, there are two Veterans Administration hospitals. One is located in Helena which is also the location of the regional office, and the other is located in Miles City. During fiscal year 1974, Miles City had an average daily patient census of 76 persons, of which 27 were in for surgery. Fort Harrison in Helena had 144 and 50 persons, respectively. The total number of persons treated in each hospital was 1,761 in Miles City and 2,649 in Helena.

There are two types of income support programs for veterans. Compensation provides income to veterans who suffered service-connected disabilities, and to survivors of veterans who die during military service. Pensions are given to those in "need", mainly the aged. In fact, the average pensioner in 1971 was 68 years old, and two-thirds of all people receiving pensions were over 65 years of age. During fiscal year 1974, 17,258 persons received payments from both programs in Montana at an estimated cost of \$22.9 million.

The wave of employment and training programs for the veteran has made the adjustment process for the veteran much easier. A single veteran may receive \$270 a month to go to the college of his choice, or he may enter a variety of vocational-technical schools. Through the U. S. Employment Service, various job training programs are available as well as military unemployment compensation to provide temporary income during the job-seeking process. The help of these programs can be partially measured by the fact that in fiscal year 1974, 87.8% of all male veterans participated in the labor force, compared to 72.9% for male non-veterans.

In October 1973, 800,000 veterans between the ages of 20 and 34 were enrolled in college. However, only 53% of these students were enrolled full time, compared with 72% for non-veterans. In Montana, there were 2,750 veteran students enrolled in Montana's colleges and universities, and 520 enrolled in Montana's vocational-technical schools in December 1975.

Besides the above-mentioned programs for veterans, there are many others including insurance benefits, burial payments, VA guaranteed home mortgage loans, etc. This country has tried to continually update veteran benefits and help take care of those who served in her defense.
